Summary of air transport

Air transport facilitates integration into the global economy and proprovides vital connectivity on a national, regional and international scale

Air transport allows people from different countries to cross international boundaries and travel other countries for personal, business, medical, and tourism purposes

growth of air transport

of 4.3% per annum over the next 20 years. If this growth path is achieved by 2036 the air transport industry will then contribute 15.5 million in direct jobs and \$1.5 trillion of GDP to the world economy.
